Author Index—Volume 122 (2000)

Baral, C., V. Kreinovich and R. Trejo
Computational complexity of planning and approximate planning in the presence of incompleteness 241–267
Benferhat, S., A. Saffiotti and P. Smets
Belief functions and default reasoning 1– 69
Cohn, A.G., see Isli, A. 137–187
Dean, T., see Givan, R. 71–109
Dorndorf, U., E. Pesch and T. Phan-Huy
Constraint propagation techniques for the disjunctive scheduling problem 189–240
Givan, R., S. Leach and T. Dean
Bounded-parameter Markov decision processes 71–109
Isli, A. and A.G. Cohn
A new approach to cyclic ordering of 2D orientations using ternary relation algebras 137–187
Kreinovich, V., see Baral, C. 241–267
Leach, S., see Givan, R. 71–109
Pesch, E., see Dorndorf, U. 189–240
Phan-Huy, T., see Dorndorf, U. 189–240
Saffiotti, A., see Benferhat, S. 1– 69
Smets, P., see Benferhat, S. 1– 69
Stell, J.G.
Boolean connection algebras: A new approach to the Region-Connection Calculus 111–136
Trejo, R., see Baral, C. 241–267
